

## Environmental Policy

At Ansar Deco we are committed to the environment, health and sustainability in all aspects of product, design, management and product life cycle.

Our approach is holistic and therefore we use materials with the lowest possible impact on health and the environment and we continuously work to improve our working environment, our internal processes, and the raw materials of our products.

### **Ansar Deco's environmental goals:**

- To comply with environmental laws and regulations and customer requirements.
- Prevent and minimise the negative impact of our company on the environment.

### **Our commitment:**

- Complying with this statement and the actions resulting from its implementation
- Continuous reduction of the company's negative impact on the environment.
- Reduce, separate, reuse and recycle waste such as paper, plastic, packaging, etc.
- Sharing our environmental manifesto and policy with Ansar Deco employees and partners.
- Annual contribution with the highest rate of plastic and cardboard waste management of ECOEMBES.
- Carbon footprint measurement according to international GHGP standards and active work for its reduction.
- Annual update of the Green Manifesto

### **In terms of products and packaging:**

- Distribute and develop products with fabrics that are Oeko-Tex 100 certified or equivalent.
- Use durable and PVC-free raw materials.
- Propose and develop products with recycled raw materials (100% recycled polyester) in fabrics.
- Develop and produce products with maximum shelf life and avoid planned obsolescence.
- Sustainable packaging: develop and promote packaging that is 100% recyclable and made from recycled materials.
